INTERESTS

o 3D Printing
o Mechatronics enthusiast
o Sports - Athletic

PROFILE

Since my teenhood I always found myself linked to the technological world with PC assembly and repair. In high school I started with basic concepts of lineal programming in CNC and then logic adapted to automated systems, PLC.
For many years I put it aside, but in 2018 I wanted to return to the technological world but hand in hand with development, I studied at EGG Tech and took several courses related to software development and programming of microcontrollers. I am currently studying and will continue to do so, since I considerer that throughout life we are able to continue learning.

My strengths:
- Ability to lern new knowledge
- Ability to teach and group management
- I am a dedicated person
- I consider myself a calm and thinking person
